AWS means Academic Watch Status. These schools failed to make AYP for two additional years after being placed on Academic Early Warning (or four annual calculations of missing AYP) and are eligible for additional state sanctions.

Status: Academic Watch 1 and Federal Corrective Action

School has not made Adequate Yearly Progress for four consecutive years. Illinois requires a revised school improvement plan and will assign an external support team to work with educators and assist with School and District analysis. Extended day and year programs are optional. The State Superintendent will appoint a School Improvement Panel for each school in this status. In addition, Title I schools must offer School Choice and Supplemental Education Services. Other options required by federal law for Title I schools include extended school day/year and/or incentives for Highly Qualified Teachers and/or external curriculum modifications.
